DEPARTMENT OF ECONOMICS  
M.Sc. IN ECONOMIC AND BUSINESS STRATEGY**

**Financial Analysis**

**Instructor: Professor Angelos KANAS**

**Office Hours: Monday 17.00-18.00, by appointment. Office: 521 Main Building**

**Contact: [akanas@unipi.gr](mailto:akanas@unipi.gr)**

**210 4142295**

**COURSE OBJECTIVES:**

The course aims at providing a deep understanding and appreciation of topics in corporate finance, financial markets, and banking. The course describes both the theory and practice of financial decision making by corporations, financial managers, and investment funds, and shows how financial theory can be used to address practical problems and illuminate institutional aspects of the financial world. The course will emphasize the decision making for financial corporate policies and certain financial markets of options and financial derivatives. Specific topics to be covered include financial derivatives and applications in investments, currency markets, the determination of exchange rates and exchange rate risks, financial market operations, financial policies, banking and stress tests, and applications using EVIEWS and R.

**MODE OF INSTRUCTION:**

The course will use a mixture of lectures and text reading assignments, supplemented with solution of problems, case analyses and presentations (both written and oral) to better appreciate the application of theoretical concepts and tools to various real-world financial situations: an oral group presentation and a written report on an assigned case are expected.

**SOFTWARE**

Students are advised to download the free student lite version of EVIEWS 10 (<http://www.eviews.com/EViews9/EViews9SV/evstud9.html>).

Students are also advised to download **R** (<https://cran.r-project.org/bin/windows/base>).

10		Applications of VaR and banking issues in R
11		Project Presentations
12		Project Presentations
13		Final exam.

**COURSE EVALUATION:**

Your performance will be evaluated by a written final exam (70% of the final mark) and a project (30% of the final mark). The project will be a group work, which must be submitted to the instructor in weeks 11/12. Each member of group will be required to present his/her contribution to the project. The submitted work will be assigned a group mark (15% of the final mark), whilst the presentation an individual mark (15% of the final mark). Thus, the project will carry 30% of the final mark. The relative weights of each are:

Final Exam	70%
Project	<u>30%</u>
Total	100%
